

CHARGING POLE

eMC2

EXTENDER WITH CHARGING SOCKETS & reev Dashboard Basic

44 kW

The charging pole eMC2 has two integrated Type 2 charging sockets. Thanks to its ability to charge two vehicles simultaneously, and its intelligent reev Dashboard, it is the ideal solution for semi-public and public applications. In multiple unit installations up to 7 eMC2 extender charging poles can be connected to one controller. Alternatively, the eMC2 charging pole can be configured for stand-alone use via the software provided. With a Type A residual current circuit breaker (RCCB) and DC fault current detection integrated as standard, the charging pole with Dashboard is pre-installed and ready for connection by the installing technician and for immediate use. The charging pole eMC2 with reev Dashboard Compact is 'Made in Germany' and offers the highest safety standards available.
